Support the Extraordinary

The Knobloch Family Farmhouse opened on November 1, 2018, on time and on budget!

ANNUAL REPORT 2017.18
Mission
The Stamford Museum & Nature Center is dedicated to the preservation and interpretation of art and popular culture, the natural and agricultural sciences, and history. The Museum is a vital cultural and educational resource for the community, and a focal point for family activity and interaction. We seek to inspire creativity, foster self-discovery, promote environmental stewardship, and nurture an appreciation for lifelong learning through exhibitions, educational programs, and special events that enhance the visitor’s experience of our unique site.

A Vision Realized — Now & For Future Generations

We are pleased to report that the Stamford Museum & Nature Center has finished FY2017.18 with solid financial performance and continued exciting plans for the future.

This year marks a milestone in our history as we unveil the first new capital addition to our property in over 50 years. The Phase I Environmental Education Farmhouse is nothing short of transformative. As of this Annual Report development in November, we have already opened the beautiful new Knobloch Family Farmhouse overlooking our Heckscher Farm.

We are so grateful to our Founding Investors (so far!) in the Campaign for Future Generations who have gotten the Campaign to $9.5 million, however, we still have a ways to go with our fundraising to reach the $15 million goal. We are excited by the Phase II Astronomy Center project envisioned by our Master Plan. Let’s keep going!

We are most grateful to Carol and Michael Fedele for leading our Campaign for Future Generations with their wisdom and devotion to the Stamford Museum & Nature Center.

Every day we are guided by our exceptional mission, which touches all aspects of our institution and challenges us to scale new heights of service. We are committed to these five key aspects of that vision:

1. Our aspiration to be THE regional resource for environmental and natural science education and to teach our children well from a diverse pallet of offerings.

2. To be an innovative and challenging cultural arts teacher through our art and exhibitions program. And in the coming year we will be focused on a new signature series of Adult Programs to engage our lifelong learning audience.

3. To get children out-of-doors and engaged in the natural world around them. We are deeply committed to Richard Louv’s “no child left inside.”

4. To explore and develop our community role and our opportunities to enhance environmental programs, astronomy, social engagement, and our unique position as Stamford’s largest and most diverse nature-based organization.

5. To engage a committed audience of funders – Premiere Partners, Business Affiliates, major donors, and our devoted Members.

We are grateful for our membership, donors, and community for their continued support of our mission. We are also pleased to know that our efforts to enhance our unique position as Stamford’s fine arts museum and our commitment to being a premier regional center for environmental, agriculture science, and nature education has earned the SM&NC ever-growing numbers of members and visitors. Overall, the Stamford Museum & Nature Center attracted 200,000 visitors in 2017.18. Most notably, our educators touched the minds of 38,000 students by presenting 1,697 programs in 158 schools through the region, including every public school and most every private schools in Stamford.

Our thanks go to the SM&NC staff for all of the excellent work they have done to bring us through another winning year of program success. Special appreciation is due to Melissa H. Mulrooney, who this year enjoyed her 13th anniversary as our Executive Director & CEO. Her commitment to excellence and best practices is held as a model for all of us. Our shared success is measured in our rising profile as a spectacular cultural and educational force for the City of Stamford and the region.

We are deeply grateful to Governor Dannel P. Malloy for his confidence in our Campaign for Future Generations and the State of Connecticut’s commitment to our success. We wish to thank Mayor David M. Martin and the City of Stamford for their continued public-private partnership with us – assisting us with capital and operating support with the clear understanding of our value and economic development impact. We are deeply grateful.

We gratefully thank William M. Aron, who masterfully served our institution with selfless dedication since 2008, when he joined our Board of Directors. Serving as Board President since June of 2012, William deftly guided our board with visionary leadership through a period of unparalleled expansion, growth and advancement.

Here’s to another wonderful year of service and to our magnificent future! In the following pages, you will see terrific outcomes from our collective work together in 2017.18. Melissa and I hope all of you will join with us for another year of enrichment and engagement. You and your families are vital to our success.

With warmest thanks for of your continued support and delight in the SM&NC!
Volunteer & Community Support

During 2017-2018, the Stamford Museum & Nature Center enjoyed the support of 601 volunteers, who collectively donated more than 9,200 hours of time. In many cases, our corporate partners not only supplied a small army of volunteers, but also the funds to purchase necessary materials.

Volunteer opportunities – and volunteers – came in all ages, shapes, and sizes. From middle school students to retirees, corporate and community teams and subject matter expert professionals, our enthusiastic volunteers came through to make the SM&NC shine in ways both highly visible and behind-the-scenes, including:

• Assisting Heckscher Farm staff with all aspects of animal care for our creatures great and small.
• Helping out at festivals and special events in food tents, arts & crafts, games & activities, face-painting, and popcorn sales.
• Beautifying our site by planting trees, grooming trails, weeding flower beds, and painting indoor classrooms and outdoor benches.
• Coordinating mailings, updating contact files, conducting research, and other administrative tasks.
• Amplifying publicity for our programs, special events, and exhibitions.
• Securing enticing auction items to bolster our revenue and lend style and panache to our fundraisers.
• Providing print production supervision and other pro bono marketing services.

The SM&NC was fortunate to have the support of volunteer groups and individuals representing local corporations including:

• Aquarion Water Company
• Ernst & Young
• First County Bank
• Frontier Communications
• Indeed
• JP Morgan Chase
• Legg Mason
• Pitney Bowes
• RSM US
• Starbucks
• State Street Global Advisors
• TATA Consultancy Group

Volunteers came to us from:

• Abilis
• ARC
• Brunswick School
• Boy Scouts of America
• Bi-Cultural Day School
• EF Academy
• Future Five
• Hotchkiss Alumni Association
• Housing Development Fund
• Ridgefield Parks & Recreation
• Sacred Heart University
• Stamford Garden Club
• Stamford JCC
• University of Michigan Alumni
The SM&NC-Aligned-With-the-Schools program was strong for another year, with growth in both the number of schools and organizations reached, as well as our regional footprint.

Over 38,000 students and group members from 158 organizations participated in our school and after school programs within the 2017.18 school year. We continued to see an increase in farm-based education, as well as our Next Generation Science Standards (NGSS) aligned classes such as What’s it Matter? and Ecosystems Everywhere. Our team of Environmental and Farm Educators delivered 1697 programs in total.

Once again, we expanded our footprint and our reputation for quality environmental education throughout Fairfield and Westchester Counties, as well as other parts of Connecticut and New York. We visited a number of libraries throughout Connecticut and New York, which expands our potential visitor base and help to grow our library membership program. We also participated in special programs such as Science Days at the Intrepid Air and Space Museum in New York City and Stamford STEMfest. Once again, the generous support of local organizations allowed us to provide transportation to more than 1,000 students who would otherwise not have the opportunity to visit the SM&NC. We also completed our third year of an Alliance grant funded program with the City of Stamford that brings NGSS programming to all Stamford Elementary schools. Once again we had 100% participation among all Stamford 1st grade classrooms for our interactive, inquiry based Insects & Invertebrates program.

We also continue to develop long term partnerships with local schools that allow educators to bring programs to students throughout the school year, ensuring that environmental education is a robust part of their curricula. Schools such as Stanwich, Selma Maisel Nursery School, KT Murphy Elementary, The Children’s School, and Children’s Learning Centers of Fairfield County receive custom curricula that engage students, and meets benchmarks and standards, throughout the school year. Our Discovery Spaces, areas within a school maintained by SM&NC and designed with live animals or science activities, allow for another level of interaction with schools.

Our Heckscher WILD! Exhibit continues to be a strong draw for both school groups and public visitors. We welcomed more than 37,000 visitors to the exhibit this year, totaling more 110,000 people since opening in 2015. Our 40+ plus species of teaching animals from across the globe provide visitors with amazing opportunities for interactions through feedings, demonstrations, and other programming.

Our Art, Nature & Me Preschool completed another year as the area’s premier nature and play based school for area preschoolers. Almost 120 three and four year olds attended two, three, or five day morning and afternoon weekly sessions, led by our team of amazing Early Childhood Educators.
Stamford Museum Exhibitions

Welcoming roughly 30,000 visitors to our galleries, this year brought with it restored energy and excitement including the introduction of our new Curator of Collections & Exhibitions, Jillian Casey.

Charged with thought-provoking history, creative culture, and extraordinary art, our annual exhibition schedule continues to stimulate our local and regional communities as well as drawing intrigue from those afar.

We make certain the care of our SM&NC permanent collection is a top priority. Numerous noteworthy works of art and sculpture from the collection have been conserved this year including a remarkable still life from 1925 by world renowned Modernist, Alfred Maurer. Ruth and the Four Seasons marble sculptures leading up to the Bendel Mansion were beautifully cleaned in the spring. Origami & Orbis a Deux, the large outdoor “ribbon” sculptures by Lila Katzen which were donated by The Aldrich Museum have also recently been cleaned and restored.

The exploration of the science behind maize and why it’s been one of the most significant crops to humankind was the focus of Maize: Mysteries of an Ancient Grain in the summer of 2017. Illustrations of Imaginative Literature: The Korshak Collection was highlighted in the fall as we had the pleasure of presenting the history of the science fiction, fantasy, horror and adventure genres of literature. SM&NC veteran artist Steve Gerberich brought us Gerberich’s Gadgets: Best of Springs, Sprockets & Pulleys making for a very special (and fun!) holiday exhibition. Birds in Art, a wildly successful exhibition, bringing in almost 6,000 visitors to the museum in just a couple short months was our spring feature. Organized by the Leigh Yawky Museum in WN, we are excited to welcome back the 45th anniversary exhibition of Birds in Art in 2021. At the end of June we opened Once Endangered: The Return of Wolves & Peregrine Falcons, which proved to be a popular 2018 summer exhibition.

In addition to our active exhibition schedule, we introduced the Art After Dark program, a new curated series of after-hours adult art-soirees. Programmed by Jillian Casey, Art After Dark allows one to experience SM&NC as never before; merging art and nature, the visual and the sensory through creative programs inspired by SM&NC exhibitions, collections and its rich history. The series kicked off alongside the Birds in Art exhibit with an evening bird walk and book signing with naturalist and author Frank Gallo in May followed by a live Bird DJ video performance by artist Michael Barraco with drawing in the galleries in June. Generating much enthusiasm, the events collectively drew over 80 people to the museum after-hours.
The Stamford Museum & Nature Center remains a popular spot for individuals and businesses to hold their private and corporate events. During the past fiscal year we hosted 5,187 attendees at 65 events, maintaining the Facility Use growth we have achieved over the past few years. Clients appreciate the flexibility that the SM&NC’s unique site allows. With different indoor and outdoor spaces for groups large and small, we were able to provide a space to suit each individual’s needs. The Bendel Mansion provides a beautiful backdrop for wedding ceremonies, and we were delighted to welcome sixteen couples into our space for their special day. Our Wheels in the Woods picnic area was the perfect setting for both corporate retreats and family gatherings last year. Other events we hosted include corporate meetings, professional society dinners, wedding showers, tea parties, and parent socials.
Another set of seasons has passed on our productive Heckscher Farm; a year that saw changes and growth.

Staff did a full inventory of our sugarbush maple areas, retiring some trees and adding new trees to the tap list in preparation for the 2018 season.

Cheshire Barn, one of the jewels of Heckscher Farm, received new windows, due to a generous grant from the New Canaan Community Foundation.

Our Organic vegetable garden grew to new heights as staff experimented with vertical structures to increase variety and yield. Over a half dozen species of varietal corn was grown to coincide with our summer *Maize: Mysteries of an Ancient Grain* exhibition, and all summer these crops provided food for animals, staff, and programming. This year the farm welcomed one alpaca cria, eight ducklings, 16 lambs, 16 chicks, and 17 kids. We also saw the first year of Heckscher Farmers, a program designed to give summer campers in grades 1-4, a small group, hands on experience in farming. The program was met with resounding success with a 100% enrollment with wait list.

Our SM&NC Sunday Farm Market kicked off another successful year, with great new vendors and returning favorites. The Heckscher Farm stand sold our own eggs, wool, and syrup, as well as items like meat and milk, in partnership with other local farms. Our market-based Edible Science series bridged food and science, as participants discovered secrets of their favorite foods, such as elasticity of dough, while exploring where our food comes from.
SM&NC BY THE NUMBERS

200,706 VISITORS
enjoyed the wonders of our extraordinary site

38,000 STUDENTS
from 158 SCHOOLS
participated in 1,725 SM&NC Aligned-With-The-Schools Educational programs and After School programs

35,144 ARTS & CULTURE ENTHUSIASTS
viewed the exhibitions in our Museum Galleries

1,055 CHILDREN
participated in our summer camp

2,563 MEMBER HOUSEHOLDS
enjoyed the benefits of SM&NC Membership

928 ADVENTURERS
explored the outdoors as part of our “Take a Hike” week

37,765 VISITORS
interacted with live plants and animals at Heckscher WILD!

3,285 BALES OF HAY
were fed to our animals

21,512 GUESTS
enjoyed our seasonal festival weekends and public events

601 VOLUNTEERS
supported the SM&NC’s programs and events

20,896 FRIENDS
like us on Social Media
Through our exceptional educational programs, family festival weekends, museum exhibitions, working New England farm, 80-acres of nature trails, and certified Art, Nature & Me Preschool, we are the model for experiential education and creating lasting memories for individuals of all ages.

Over the years, we have creatively adapted our facilities to meet the growing needs of the community. We have used capital funds wisely and responsibly to renovate buildings to make the most of each educational area of our campus. However, though we have grown by more than 100 percent in the last 10 years, there has not been a new program building added to our campus in five decades.

We embarked on a Master Planning process in 2008. Over a two year period, we developed a visionary design to identify critically needed infrastructure, capital improvements, and enriched educational and public spaces to build future capacity for the SM&NC.

On November 1, 2018, The SM&NC proudly opened and dedicated the Knobloch Family Farmhouse, a 4,000 square foot facility that will serve as the hub to deliver the SM&NC’s cultural and educational missions. A new Sugar House + Cidery is its companion structure, and a renovated and expanded Parking Lot and Admissions Booth to provide improved access to the campus.
Phase II: Astronomy & Physical Science Center Fundraising Marches On!

The Second Phase project is a new $10 million Astronomy & Physical Science Center. Initial design plans call for an 8,000 square foot facility that will be ADA compliant. It will be a three-level structure that includes the following features:

- A first floor lobby and 100-seat Planetarium auditorium with state-of-the-art technology an educational classroom; an elevator; ADA compliant restrooms; the astronomy and physical science education office, and other amenities.
- A second floor Science Lab classroom
- A third level public, outdoor viewing deck and warm room leading into the telescope dome housing a new state-of-the-art public viewing telescope.

WHAT WILL HAPPEN INSIDE?

- **Enriched School Curriculum**
  The theater style seating will accommodate large groups providing a unique learning environment for students and teachers both locally and regionally. The dedicated Science Lab and Classroom facilities will bring science alive with classes such as *What’s It Matter? A Girls Only STEAM Science Camp* is planned to include studies in force, motion, energy, engineering, mathematics, physics, astronomy and art.

- **Youth and Family Programs**
  Planetarium shows will be scheduled weekly and special programming will be available during summer and school vacation weeks. STEAM-based on-site and after school programs will be held in the Science Lab for families. There will be an expanded lecture series to coincide with astronomical events. Science-based birthday parties will be offered to include hands-on activities in the Lab and tickets to a planetarium program, and astronomy badges will be offered for Scouts.

- **Adult Programming**
  The Planetarium auditorium enables expansion of new programming to enhance collaborative and partnership efforts to include book signings, author talks, expert panel discussions, lectures and concerts. State-of-the-art multi-media technology will provide opportunities to develop unique and customized programs for adult audiences.

- **Community Collaboration and Facility Use**
  The Astronomy & Physical Science Center is designed to be a significant community resource presenting space for evening community group meetings, astronomy and even travel lectures. Corporations and other community institutions and organizations will be invited and encouraged to utilize the facility for special activities and gatherings.

*The Campaign for Future Generations* has raised $9.5 million total in commitments against a goal of $15 million. To learn more about *The Campaign for Future Generations* please reach out to Liz Labrosciano at (203) 977-6545.
Stand With Great Leaders

Business Affiliate members of the Stamford Museum & Nature Center are an influential, committed, and engaged group of business leaders, both global and local, who are aligned with our mission to bring the wonders of art, nature, astronomy, and early childhood education to the community.

Business Affiliate members wish to advance the communities in which they live and work, and demonstrate this by generously supporting our education programs and mission.

Business Affiliate membership helps to support our educational programs, which reached over 38,000 local students last year at 158 area schools. Business Affiliates also support the SM&NC through their sponsorship of Family Festival Weekends and Events, like our Annual Oktoberfest and our Farm to Table Suppers. Many corporate partners also participate in corporate volunteer days helping to plant trees, maintain trails, chop wood, and more.

The Stamford Museum & Nature Center is grateful to our Business Affiliate Members and their partnership, and is honored to offer them genuine quality-of-life benefits for their families, including corporate family memberships, program participation, and event planning. We are proud of our Business Affiliates program and the exemplary business leaders who are aligned with our success, and look forward to adding additional local business leaders to this influential group in the coming year.

We thank the following Stamford Museum & Nature Center Business Affiliates members for their generous support over the past year.

- Aquarion Water Company
- Bank of America
- Day Pitney, LLP
- Eastern Land Management
- Ernst & Young
- Eversource Energy
- F.D. Rich Company
- First County Bank
- General Reinsurance Corporation
- PKF O’Connor Davies, LLP
- Pitney Bowes, Inc.
- Purdue Pharma, LP
- Reckson, A Division of SL Green Realty Corporation
- State Street Global Advisors
- TLC, Beatrice, Inc.

Business Affiliates volunteers from Pitney Bowes, Inc. enthusiastically lend support.
Our Director’s Circle is a distinguished group of individuals who are passionate about the development of our community. Their generosity and commitment to the Stamford Museum & Nature Center support our holistic mission to bring the wonders of art, culture, nature, astronomy, and education to our community and the public. We thank all of our Director’s Circle members for their enduring support.

2nd Annual Benefit Dinner

The 2nd Annual Benefit Dinner at Woodway Country Club on March 15, 2018, was a tremendous success. Good friends and generous supporters of SM&NC previewed an update on progress at our new Environmental Education Farmhouse. Guests also enjoyed an evening of cocktails, hors d’oeuvres, and a delicious dinner. The evening served as kick-off for our 21st Annual Food & Wine Celebration.

21st Annual Food & Wine Celebration

The Stamford Museum & Nature Center welcomed over 300 supporters to the 21st Annual Food & Wine Celebration on Friday, June 1, 2018. This festive fundraising celebration and silent auction is held annually to benefit the SM&NC’s programs which serve thousands of children and families every year. On a beautiful spring evening, guests tasted artisanal foods courtesy of local caterers and restaurants, sampled fine wines from a variety of notable vintners, and perused an exciting selection of silent auction items.

Stamford Museum & Nature Center
Projected Statement of Financial Activities
2017-18 Operating Year ending June 30, 2018

The Stamford Museum & Nature Center has finished the 2017-18 fiscal year on sound footing. We continue to work diligently to build the capacity of this vibrant institution with creativity, resourcefulness, and optimism.

Annually, we must raise at least 66% of our finds to operate this remarkable 118-acre property. Corporate, foundation, and individual support is so meaningful and critical to our success. We thank all of our supporters, members, and participants for your generous, ongoing contributions.
